Bernard Mordan

Senior Full Stack Engineer

(Node.js, TypeScript, React)

Summary

Senior Full Stack Engineer with 10+ years of experience specializing in Node.js, TypeScript, and React ecosystems. Proven track record of owning features from design to deployment in high-growth startups (Hertility, Multiverse) and large-scale government systems (Home Office). Expertise in building scalable APIs, architecting internal products, and mentoring engineering teams.

Experience

Oct 2023 - Present: Full Stack Engineer, Hertility Health

- Led the build of the company's first React Native mobile application, serving as the primary contributor.
- Own and enhance the core clinical diagnostic algorithm, collaborating directly with the clinical team to translate medical logic into robust, production-grade TypeScript code.
- Develop and maintain features across the full stack (PostgreSQL, Node.js, GraphQL, Next.js).

Feb 2019 - July 2023: Senior Software Engineering Coach, Multiverse

- Architected and developed the Level 4 Software Engineering apprenticeship curriculum from the ground up, defining the technical content and assessment strategy.
- Mentored and tutored multiple cohorts of 20+ junior engineers, guiding them through the full software development lifecycle for the level 4 iFate Software Engineering apprenticeship.
- Led technical coaching and progress reviews with line managers for apprentices at world-leading companies, including **Meta, Sky, Unilever, and Barclays**.
- Spearheaded development of key internal tools:
    - **'Papper':** Designed and built a portfolio mapping tool to streamline apprentice evidence gathering. Used by the wider coaching community.
    - **'The Observatory':** Created an inovative session observation and journaling platform.

Feb 2018 - Feb 2019: Senior Node.js Developer, Home Office

- Engineered backend APIs for an internal search and visualization tool, processing a massive-scale graph dataset (2.5B+ nodes, 3B+ edges) using **Node.js, Elasticsearch, and Neo4j**.
- Led the migration of a legacy **Angular 1.5** frontend to a modern **React** application, improving maintainability and test coverage.
- Productionised data science algorithms (Python/Cypher) into a scalable Node.js API.
- Designed and deployed a **Kubernetes**-based ETL pod within **AWS** to automate data ingestion pipelines.

Autumn 2017: Freelance Developer

- Authored and published "Functional Programming with Ramda," a Udemy course enrolling over 1,000 students.
- Delivered a full website rebuild for the Christian Muslim Forum, implementing a headless CMS architecture (WordPress, GraphQL, React, Elm).

2015 - 2017: Full Stack Developer, TABLEFLIP

- Developed full-stack **Meteor.js** applications for various startup clients in a fast-paced, agile agency.
- Managed client relationships and project sprints, gaining a strong foundation in TDD and best practices through rigorous senior code review.

Education & Prior Career

Autumn 2014: Makers Academy

- Completed 12-week intensive coding bootcamp (Ruby, JavaScript, TDD).

2008 - 2014: IT Manager, Evelina Children's Hospital School

- Managed school IT network and first developed an interest in data by requesting training in **SQL** and **PHP** to provide data insights to the Headteacher, sparking my career change into software.

1997 - 2003: Studied Buddhism full-time

1994 - 1997: BA (Hons) Theatre and Arts Management, Dartington College of Arts
